Northern California Programs

Learning Services' network of programs provides safe and supportive environments that address the individual needs of our residents, families and financial partners. Our comprehensive approach supports individuals by giving them the resources to overcome the challenges that often arise after a brain injury. We pride ourselves in our ability to support and guide individuals to live meaningful and productive lives.

EACH PROGRAM OFFERS:

- 3:1 Direct Care staffing ratios*
- Collaborative case management
- Low-density, homelike environments
- Community-integrated living and productive activities
- Availability of comprehensive teams of brain injury specialists

As part of our nationwide network, our Gilroy Campus is situated on 10 acres of ranch land in rural Santa Clara Valley and provides residents with a supported living environment that offers structure and support on a bilingual, spacious campus. Suited for individuals who require intensive support, the shared living residences are complemented by a treatment facility and recreation area. Residential rehabilitation is offered to residents in the form of physical therapy, occupational therapy, speech language pathology and psychological counseling. The program is overseen by a neuropsychologist and staffed 24 hours per day, 7 days a week.

Spanish Speaking Program

Our Spanish speaking residents live together on the Gilroy campus. They participate in the Spanish Speakers' Day Treatment Program, which is conducted in Spanish by a staff member originally from Mexico. All the activities are designed to be culturally relevant. For example, the group makes a wonderful Mexican or Central American lunch every Wednesday. They listen to Spanish language music on the radio, watch Univision in their living room, and host parties featuring Latin American culture for the other residents.

Learning Services' Northern California program has earned a three year accreditation from the Commission on the Accreditation of Rehabilitation Facilities (CARF), which sets high standards for organizations to measure and improve the quality of their programs and services.

Therapies on Site

Our Gilroy and Morgan Hill campuses offer physical therapy, speech therapy and occupational therapy on site. Therapists work with residents to develop practical living skills right in their own home. Not only do residents benefit from learning skills right where they will use them, but the therapists train the staff so they can help residents implement their new skills all day long.

Neurobehavioral Program

Our Northern California Program also benefits from the Learning Services resources that are only a short plane ride away. Colorado is home to one of Learning Services' Neurobehavioral Programs, LSNI-West. This specialized campus is specifically designed to help adults with complex behavioral challenges master the demands of daily living.
